

GREAT EASTERN RAILWAY COLLECTION OF HISTORICAL RECORDS AND RELICS

# CATALOGUE

## SPECIAL SUPPLEMENT No. 4

### ITEMS 8001-8378: THE KINGSTONE COLLECTION OF SIGNALLING PLANS

This collection of plans was generously donated to the Great Eastern Railway Society by our member Roger Kingstone. It comprises 2,000 or more diagrammatic signalling plans for about 300 signal boxes spread across the former GER system. Many of them date from the 1960's and provide a record of the track layout, signalling and locking prior to the wholesale rationalisations and closures which occurred later in that decade.

Prior to their deposit on loan to the Essex Record Office the plans were numbered and listed during 2004/05. The following volunteers from the membership undertook this task: Les Barclay, Peter Chappell, Chris Cock, Paul Godwin, Rodger Green, Malcolm Holt, David Lowe and Andy Wallis.

The Society's thanks are due to these members who have enabled this valuable resource to be made available to all researchers.

John Watling November 2005

## E470-E480

## SUPPLEMENT 8001

The Kingstone Collection of Signalling Plans  
Roger Kingstone
