## SPECIAL SUPPLEMENT No. 5

### ITEM 055: THE F.V. RUSSELL SCRAPBOOKS

These nine volumes of scrapbooks were compiled by Frederick Vernon Russell, late Superintendent of Operation, GER, probably in his retirement. They were passed to Mr. W.O. Skeat in the early 1950s by Russell's widow, and subsequently presented to the GERS Collection

The nine scrapbooks are identified as Items 055/1 to 055/9. The contents are largely in random order, and it would appear that Russell began by grouping related items together, but evidently ran out of space and inserted many additional sheets interleaved between the existing pages.

The contents of each scrapbooks are listed in the following table, showing the items that appear on each page. This table is divided into columns as follows:

**Page Number:**

The pages of each scrapbook have been numbered by the GERS, beginning at page 0 for the inside cover. The additional pages have been numbered 'A', 'B' etc.

**Document Type:**

- C:** Cuttings from magazines, newspapers and other printed material
- E:** Material used by Russell at the GER Mechanics Institute
- G:** Greetings and Menu Cards
- H:** Personal holiday photographs, receipts and papers
- L:** Personal and family correspondence, including birth certificates
- M:** Maps and plans not otherwise part of a larger document
- P:** Original photographs
- T:** Original typewritten text on all subjects

**Description:**

Brief description of the item. There are many photographs of personnel, but these are largely unidentified at present. It is hoped to be able to identify these in time. In the case of personal items, these are simply listed as "x photographs of holiday at y" where they have no railway-related significance, but a note is made if the items are captioned.

**Date:**

The date of the item is shown where known, or an approximation made where appropriate.

**Source:**

The original source of the item: this mainly relates to magazine, newspaper and other cuttings.

This list was compiled by Terry Bennett, March 2013
