

CONTENTS LIST FOR ALL ISSUES OF THE LOCOMOTIVE MAGAZINE 1924 to 1953
(from No. 377 Volume 30 to No. 736 Volume 59)

It appeared monthly.

This list is intended to be of service to browsers. If you spot something that may be of interest, open the file for that year then use its bookmarks to navigate to the month concerned.

Please note that only the main items are listed here, but it is hoped they will prove sufficient for you to choose the issue you wish to browse. The editing has been subjective, concentrating on items that were judged to be of the greatest general interest. Railways of Britain and Ireland have been given preference, especially those from what was GER territory, but plenty of the more distant ones do still feature.

Each annual volume includes its relevant section of this contents list at the end.

If you are after railways of a particular country, you will find 'All the indexes' will be more useful. It comprises the official indexes from all thirty volumes, and can be word-searched to find every mention in them.

Issue	Main Contents	Comments
January 1924 No.377, Vol.30	<p>New suburban tank locomotives, LNER GE Section The vacuum brake on goods trains in Western Australia New 2-8-2 Lentz valve loco for the Eskdale Rly, 15" gauge Progress of luxury travel – major article The GNR Atlantic-type express locomotives Travelling cranes for railway service Locomotives of the G&SWR, Scotland Coat of arms of the LNER The covering of carriage and wagon roofs "The Harrogate Pullman Ltd", LNER Notes on Locomotive Running Trials</p>	<p>N7 0-6-2T, details with photo of 990E Details with photo of long goods train Full account with photos With drawings of early carriages & photos of Pullmans With photos <i>[series cont. from page 365 of 1923]</i> With photos <i>[series cont. from page 299 of 1923]</i> With photos <i>[series cont. from page 339 of 1923]</i> Photo and brief description Article with drawings Full-page colour plate Paper by E A Phillipson, Stratford. No illustrations.</p>
February 1924 No.378, Vol.30	<p>New 2-8-0 mineral engine, LNER 4-2-2 No. 600, LMS Midland Section The first Garratt locomotive in Great Britain An old Belgian 'single' locomotive The Wolverton and Stony Stratford Tramway GWR old tank engines The GNR Atlantic-type express locomotives <i>[concluded]</i> Railways in industrial plants <i>[cont. from page 341 of 1923]</i> An old L&NWR goods engine Retirement of A P Parker of the GER</p>	<p>Class O2. Details with photo of No. 487N Historical details with photo Full-page photo. Hafod Copper Works, Swansea Historical details with drawings Account with photos Short account with photos Account with photos Account with photos and drawings Historical details with photo of 0-6-0 No. 1824 Report with photo</p>
March 1924 No.379, Vol.30	<p>Garratt locomotive for the Hafod Copper Works, Swansea Jersey Rlys & Tramways Co., steam rail motor No. 2 Internal combustion rail coach, Barbados Railway Locomotives of the G&SWR, Scotland <i>[cont]</i> Travelling cranes for railway service <i>[cont]</i> The development of the goods engine in Holland An improved form of steam-driven tender</p>	<p>Account with drawings, photos and map of works Account with photos, map, gradient profile Details with drawings and photo Account with photos and drawings Account with photos Account with photos and drawing Account with drawing</p>
